HANDSETS FOR ALL PERSONNEL

Keep your team in touch wherever they are on your property. Up to nine handsets can be connected to one base station, making Engenius FreeStyl the ideal system for small businesses and commercial applications. Users simply carry their FreeStyl Cordless at all times to make and receive calls when out of the office area. Calls can be transferred from the base station or between users.

The system can be installed in a matter of minutes and handsets can be added as your business grows or your needs change.

EXPANDABLE UP TO 9 HANDSETS

KEEP IN TOUCH WHILE YOU KEEP BUSY

Engenius FreeStyl is the ideal light industrial cordless phone. Perfect for caravan parks, factories, warehouses, multi-storey buildings, car dealerships, apartment blocks, offices and big backyards. With a range of up to 6km, Engenius FreeStyl allows more mobility than conventional cordless phones.

A host of user-friendly features add extra convenience. Connect the compact base station in a home or office area and enjoy the freedom and flexibility of taking and making calls anywhere on your property.

EXTREME RANGE CORDLESS GUARANTEED!

Engenius FreeStyl is guaranteed to offer more coverage than any consumer cordless phone in Australasia*.

In multi-storey buildings, the powerful 900 MHz signal penetrates brick, concrete and internal walls up to 9 floors.

Engenius FreeStyl covers up to 100,000 m² In warehouses, factories, cool stores and retail environments.

Line of sight range in resorts, golf courses, caravan parks up to 6 km.

Open space coverage in mining and primary production is up to 10,000 hectares.

SO MANY CONVENIENT FEATURES

Each Engenius FreeStyl functions as wireless intercom between handsets. This allows users to contact each other on site, avoiding the option of expensive mobile to mobile calls. Two or more handsets can be used as secure walkie-talkies independent of the base. Digital Spread Spectrum technology ensures call security and eliminates eavesdropping. One user can call one or all handsets at the touch of a button, ideal for emergency or urgent situations. A built-in speakerphone in the base unit allows handsfree use and on-hook dialling. Unlike domestic 2.4 and 5.8 MHz Phones, Engenius FreeStyl will not interfere with wireless computer networks.

BEST VALUE PER METRE RANGE

Compare the purchase price of Engenius FreeStyl with budget, short-range cordless phones. Metre for metre, Engenius FreeStyl beats the others on value by a country mile. Engenius FreeStyl delivers the extra range needed in large domestic environments and medium-sized commercial applications where standard cordless phones just don't make the distance.
